The Golden Text of the Sunday Lesson—Sermon on "Life" in all branches of The Mother Church, The First Church of Christ, Scientist, in Boston, is from I John and reads, "This is the record, that God hath given to us eternal life, and this life is in His Son."

In John's Gospel it is reported that Jesus comforted his disciples with these words: "I came forth from the Father, and am come into the world; I leave the world, and go to the Father." And he "lifted up his eyes to heaven, and said, Father, the hour is come; glorify thy Son, that thy Son also may glorify thee: As thou hast given him power over all flesh, that he should give eternal life to as many as thou hast given him. And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent."

Mary Baker Eddy writes in "Science and Health with Key to the Scriptures": "Our Master taught no mere theory, doctrine, or belief. It was the divine Principle of all that being which he taught and practiced. His proof of Christianity was no form or system of religion and worship, but Christian Science, working out the harmony of Life and Love."

How to teach a voice to "smile"

Speaking naturally is lesson one in becoming a telephone operator... and literally thousands of girls have learned it during the last year in the biggest operator training program in our history. Girls in training get a thorough grounding at regular pay... a basic course that lasts anywhere from three to six weeks.

On special practice boards like this a trainee is given hundreds of practice calls... everything from the simplest local call to a complex string of them. She learns to meet various situations... learns poise and skill and confidence. Even when she becomes a full-fledged "voice with a smile", she can call on a friendly supervisor for help on unusual calls, when she needs it.

In the weeks to come, girls now in training will take their places at switchboards, and as fast as additional equipment becomes available, thousands more will be trained to handle your calls. For we intend to do everything we can to bring the rapidly growing Pacific Coast an even better telephone service than ever before... just as soon as it is humanly possible.

An ever-improving telephone service at the least cost consistent with good wages and working conditions for our employees and a reasonable return to the thousands of people who have invested in the business.
